

NEWSLETTER

JUNE 2025

Welcome to the #3 Newsletter of the SC4EU project. In this issue, you will discover key insights from our progress in revolutionizing semiconductors across Europe.

WHAT'S NEW

Workshop and face-to-face meetings

New publications

Synergies

TECHNICAL MEETING MUNICH, GERMANY

In January 2025, we kicked-off with a “technical sync” meeting where all SC4EU partners met in Munich for an insightful discussion. More specifically, during this face-to-face meeting, we discussed the correlation between all work packages and to provide a true demand platform.

STRENGTHENING EUROPE'S SEMICONDUCTOR SUPPLY CHAINS

DISSEMINATION WORKSHOP

On May 23rd, the SC4EU consortium members met virtually to participate in the project's first dissemination workshop. During this workshop we explored basic dissemination and communication frameworks and discussed our next dissemination steps to maximise the impact of our project.

You can read more information about the workshop [here](#)

Publications & Articles

Over the past few months, the work of SC4EU partners has been transformed into fruitful publications

- Felix Engel and Fawad Khan from TIB have had a conference paper accepted, which will be presented at ENDORSE2025: The European Data Conference on Reference Data and Semantics, taking place in October 2025
- Fransoo, Jan C. and Peels, Robert and Udenio, Maximiliano, Navigating Supply Chain Dynamics for Sustained AI Growth (April 15, 2025). Available at SSRN: <https://ssrn.com/abstract=5218554>

Additionally, our project was featured in the March edition of the **INSIDE Industry Association** magazine.

SYNERGIES

The lively engagement with the **AIMS 5.0** project team at nearby booths was one of the highlights of **EF ECS 2024**. This collaboration demonstrated how European initiatives are collaborating to transform our industrial environment. While SC4EU optimizes semiconductor supply chains, AIMS 5.0's innovative work in AI-enhanced manufacturing shows how European initiatives are creating a comprehensive framework for industrial excellence.
