GENERAL ASSEMBLY MEETING IN ATHENS

We are pleased to share highlights from our **first General Assembly Meeting** held in Athens, where project partners gathered to discuss the significant **milestones** achieved and outline the exciting steps ahead. The meeting served as a pivotal moment for **reflection, collaboration, and planning**. Over the course of the discussions, the partners reviewed the work completed so far and assessed its impact on the broader goals of the project. Key achievements, challenges, and breakthrough developments were presented, showcasing the collective effort and expertise driving the project forward.

BLOGS/ARTICLES

Written By: **SC4EU partners**

We're excited to present a new series of articles that dive deep into the heart of **SC4EU** project, featuring insights from our research partners who are at the forefront of innovation. Each article highlights a specific aspect of the project, from the unique roles played by our partners to the advanced technologies and methodologies they are employing.

Stay tuned for a deeper understanding of the cutting-edge technologies and innovations shaping our path forward.

DECEMBER, 2024

Event Participation

The **SC4EU Project consortium partners** came together during **EF ECS 2024 in Ghent** to drive progress and innovation in the European semiconductor ecosystem.

The discussions at our booth highlighted the importance of building a more resilient and sustainable technological ecosystem in Europe.

We are excited to share that our **Project Coordinator, Thomas Gutt**, recently attended the **European Conference on EDGE AI Technologies and Applications – EEAI**, representing our project and highlighting the significant progress we've made so far. The event, held from October 21-23 in Italy, brought together experts, stakeholders, and innovators from across the research community, providing an excellent platform for sharing insights and exploring potential synergies.

The AIMS5.0 project is supported by the Chips Joint Undertaking and its members, including the top-up funding by National Funding Authorities from involved countries under grant agreement no. 101112089.

Kicking Off the Promotional Video Series: A Closer Look at Our Research Partners

We are excited to announce the launch of our new **Promotional Video Series**, showcasing the incredible work and expertise of our project partners. Over the coming weeks, we will be sharing a series of engaging videos that highlight the contributions each partner is making to our joint research efforts.

These videos offer a behind-the-scenes look at the people, technologies, and innovations driving our project forward.

WORKSHOP

Online Workshop for the Digital Reference Ecosystem Management and User Admin (WP2)

The workshop brought together project partners to discuss the **True Demand Framework**, a key component of the **SC4EU** project.

Our **goals** were to:

- Present the True Demand Framework idea developed in WP2
- Discuss collaboration with other work packages
- Define responsibilities in the development process and identify synergies
- Align on main framework requirements and plan further collaboration

We had an engaging and productive discussion, which led to a clear vision of the True Demand Framework architecture and data flow.
